

C7000, C2020 + BMS Basic Training

Dear Partner,

We wish to inform you that we will carry out a Basic Training covering "C7000, EC-Compressor control, C2020, Modbus basics and WIB8000.

This training is suitable for beginners and technicians with no or low experience in the Stulz controllers.

The Training will be divided in 3 Block's A, B and C. The single blocks can be booked also separately.

Date:	26.03. – 29.03.2012 full days
Arrival:	The evening before the first training day or before 9:00h at first training day
Departure:	After 17:00 on the last training day or on next day.
Participants:	max. 16 people, max. 2 people per partner.
Language:	English, no translation to other languages.

Required:

All participants have to bring along their own laptop with administrator rights.

The laptop must fulfil following features:

- Already installed IOC-Service program (latest Version)
- Installed a proper working RS232 Com interface (also via USB-converter possible)
- Installed Internet Explorer (latest Version)
- Installed a proper working Ethernet network interface card
